Desktop deployment specifications:

New computers being deployed that will be attached to the Lucas County network or receive support from LCIS must meet minimum specifications to ensure that they may be adequately supported and will not create un-reasonable demands on network resources or support staff.

The specified hardware will be selected to yield a life of at least 5 years with the expected improvements in major software programs, county initiatives and network improvements. Due to the time and effort required to develop setup procedures for each new model of computer, we will change models as infrequently as possible.

The computer will be a midsize desktop, from a major brand manufacturer as selected by LCIS and will include a parts warranty for the expected life of the computer. The attached monitor must be a LCD, at least 19" in size if it is a 4x3 or 24" if it is 16x9 (wide screen), it must have a DVI interface. Speakers are recommended but not required.

For a desktop computer, the current minimum model is a Dell 7010 with a i5-3470 processor, Windows 7 Professional, minimum of 4 GB of main memory. Only in very rare cases do we anticipate a user requiring a computer that is larger or smaller than this model.

Records of the purchase of new software or acceptable records of the prior purchase of software for a computer being replaced must be provided before commercial, licensed software will be installed. Any installed software must be currently supported by the vendor in a Windows 7 environment.

Support has been discontinued by Microsoft for Windows XP, Office 2003 and Server 2003. These products will not be installed on any new computer.
